DIGITAL USER CHURN & SALES PERFORMANCE DASHBOARD

BUSINESS INTELLIGENCE ANALYSIS FOR PT SEJAHTERA BERSAMA

Business Intelligence Analyst Internship
Dwi Budi Setyonugroho

EXECUTIVE SUMMARY

Key Performance Indicators (KPIs)

Total Quantity
11,654

Total Sales
175,475,057

"While volume is driven by low-cost digital items (eBooks), revenue is dominated by high-ticket hardware (Robots). There is a strategic opportunity to bridge this gap."

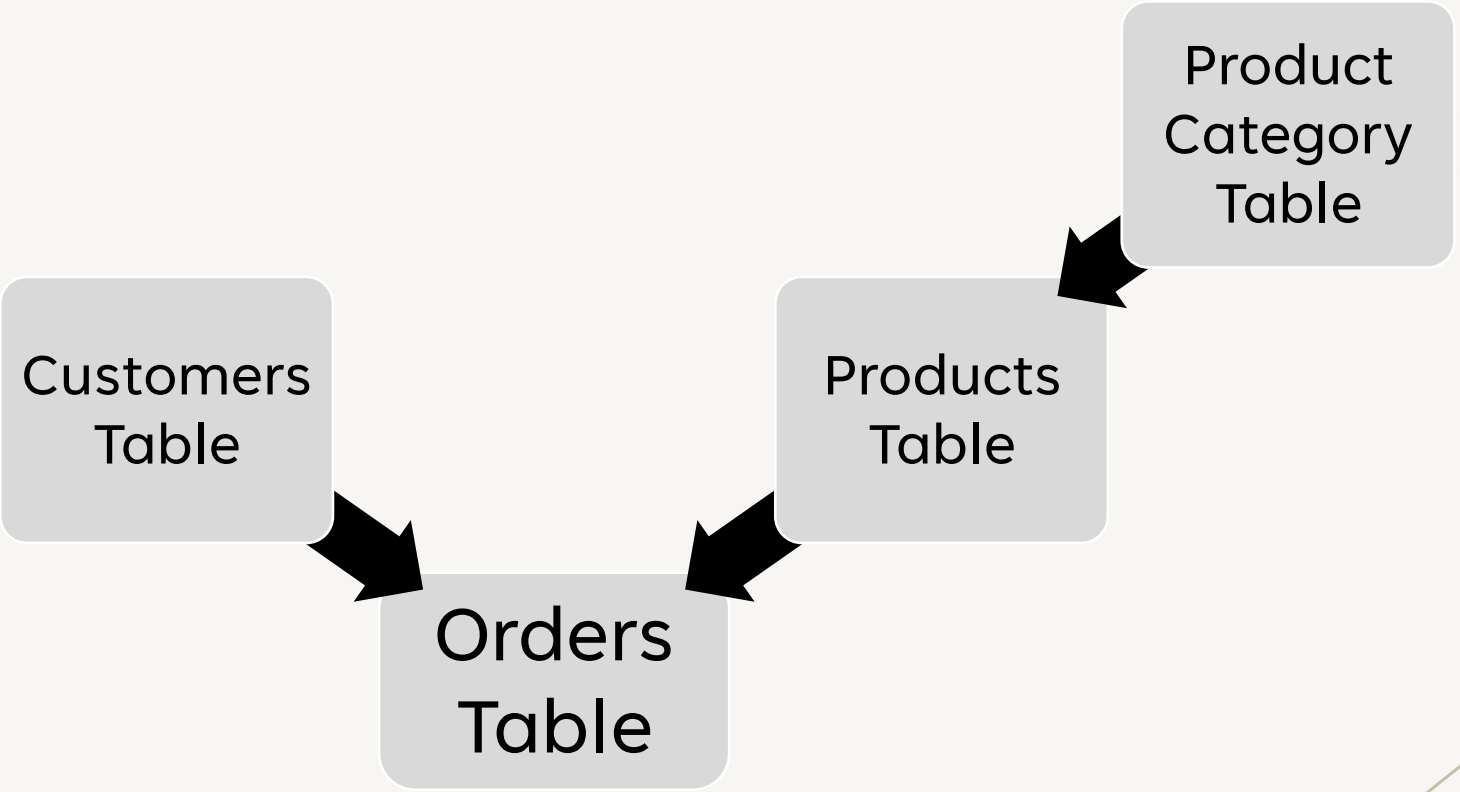
DATA ARCHITECTURE

Primary Keys Identified:

- CustomerID
- OrderID
- ProdNumber
- CategoryID

Strategy:

- Utilized a Star Schema on one-to-many approach with Orders as the Fact Table to ensure accurate aggregation.



DATA ENGINEERING PROCESS

Headline:

- Transforming Raw Data into Insights

Process:

- Imported 4 raw CSVs into Google BigQuery.
- Executed complex JOIN operations across 4 tables.
- Calculated dynamic metric: total_sales = Quantity × Price.
- Sorted chronologically to create the master_sales_data table.

Code Snippet:

```sql
SELECT
  c.CustomerEmail AS cust_email,
  c.CustomerCity AS cust_city,
  o.Date AS order_date,
  o.Quantity AS order_qty,
  p.ProdName AS product_name,
  p.Price AS product_price,
  pc.CategoryName AS category_name,
  -- Calculating Total Sales
  (o.Quantity * p.Price) AS total_sales
FROM
  `rakamin-bank-muamalat-1.bank_muamalat.Orders` AS o
JOIN
  `rakamin-bank-muamalat-1.bank_muamalat.Customers` AS c
  ON o.CustomerID = c.CustomerID
JOIN
  `rakamin-bank-muamalat-1.bank_muamalat.Products` AS p
  ON o.ProdNumber = p.ProdNumber
JOIN
  `rakamin-bank-muamalat-1.bank_muamalat.ProductCategory` AS pc
  ON p.Category = pc.CategoryID
ORDER BY
  o.Date ASC;
```

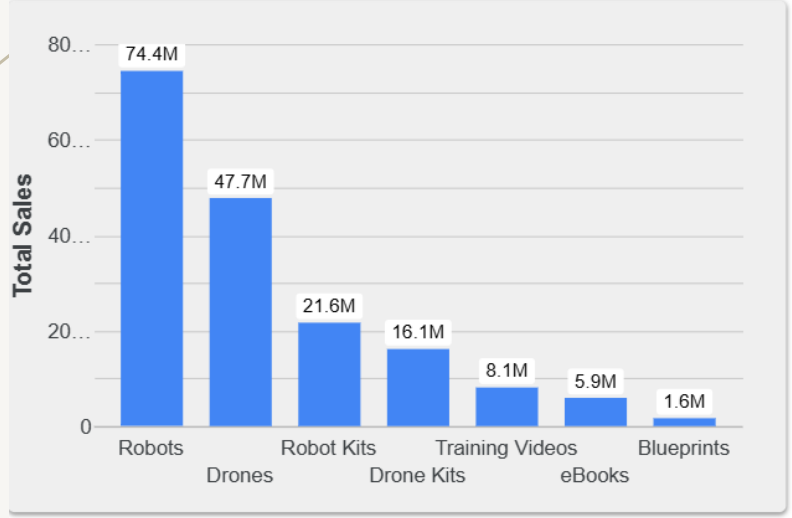
DASHBOARD OVERVIEW

PT Sejahtera Bersama Sales Performance & Insights Dashboard

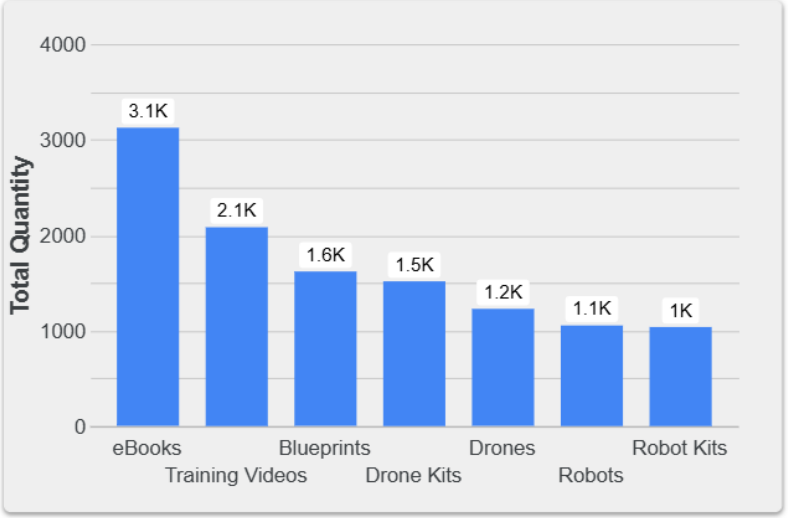
Total Quantity
11,654

Total Sales
175,475,057

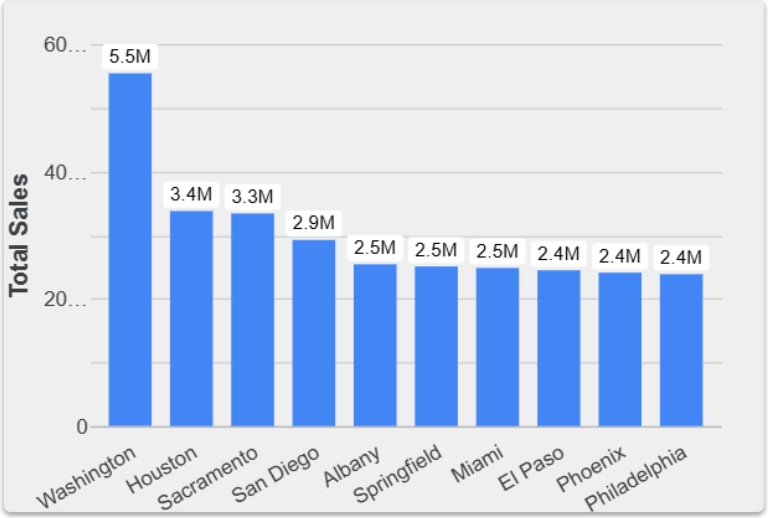
Total Sales by Category



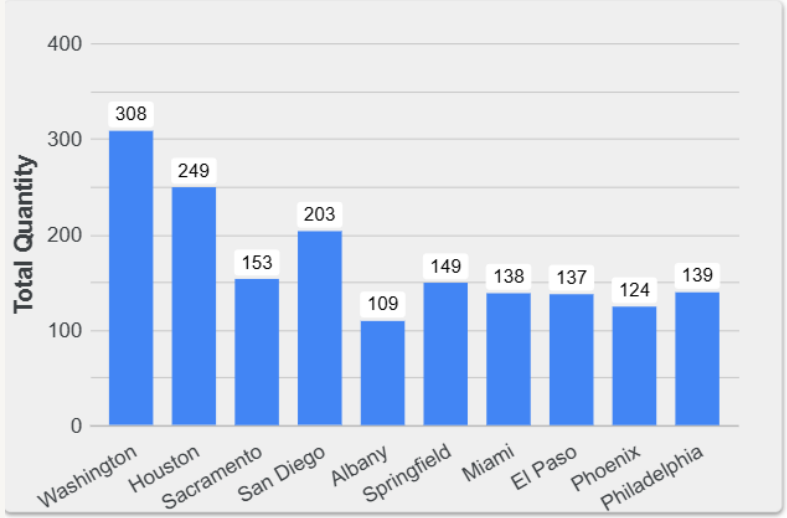
Total Quantity by Category



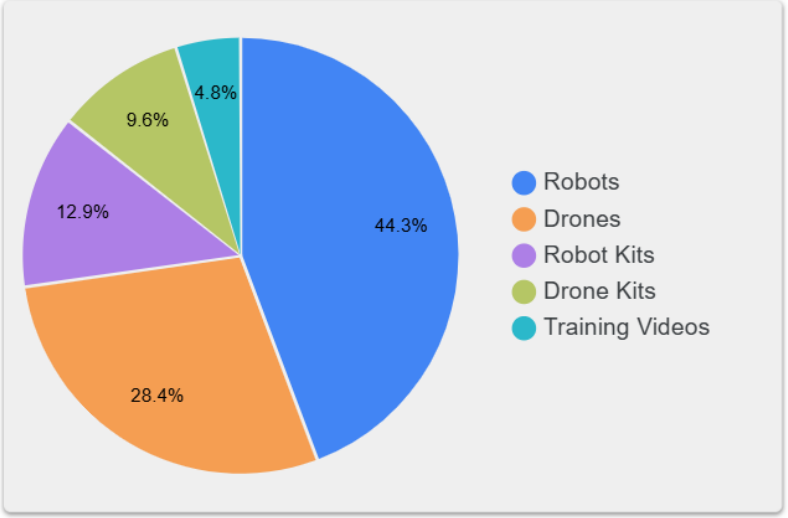
Total Sales by City



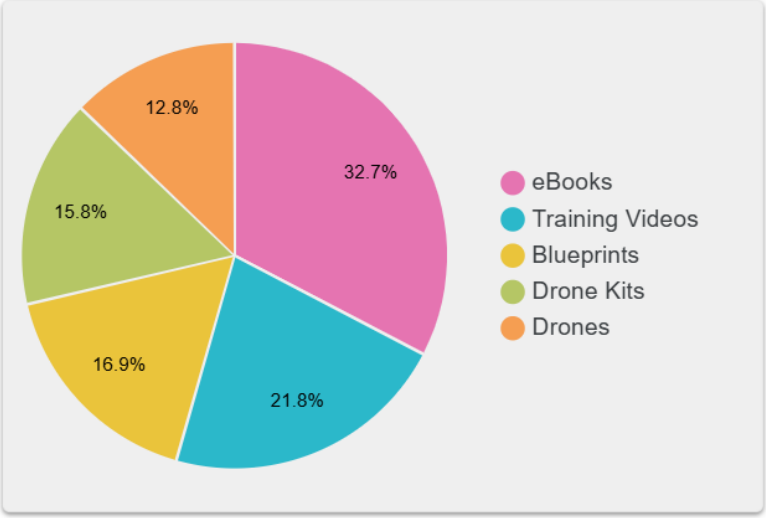
Total Quantity by City



Top 5 Categories by Sales

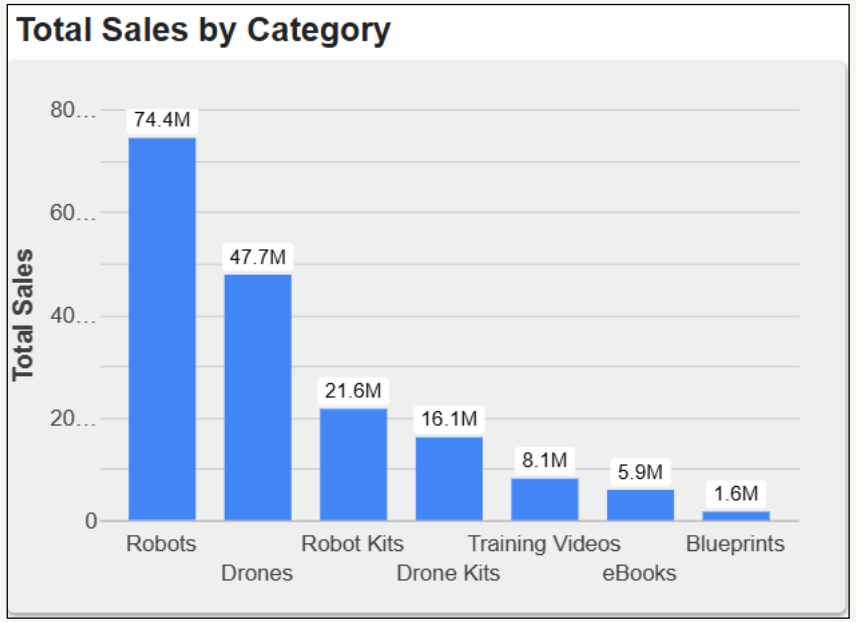


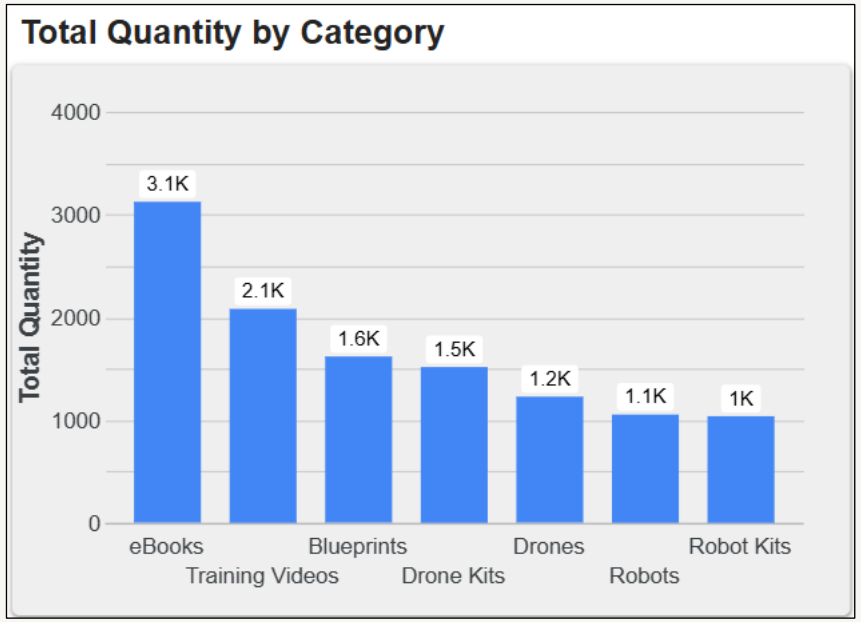
Top 5 Categories by Quantity



DEEP DIVE – PRODUCT PERFORMANCE

The Volume vs. Value Disconnect



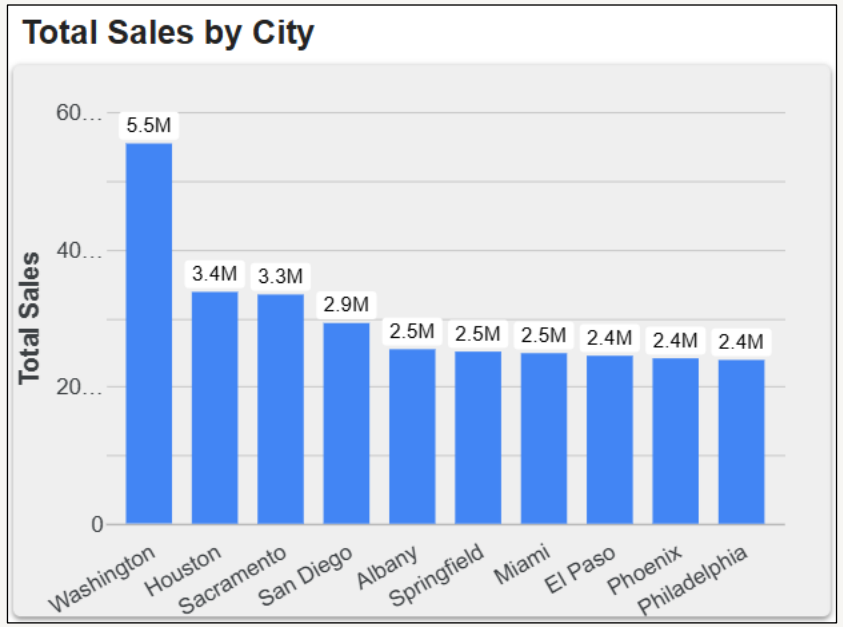


Key Takeaway

Customers buy eBooks frequently but spend heavily on Robots. We are missing cross-sell opportunities between these segments.

DEEP DIVE – GEOGRAPHIC INSIGHTS

Regional Dominance & Opportunity



Insight

Washington DC outperforms the next closest city by 60%. This indicates a successful local strategy that should be replicated in Houston and Sacramento.

STRATEGIC RECOMMENDATIONS

Strategic Proposals for Growth

Product Bundling

- **Action**: Bundle "Robot Starter Kits" (Hardware + eBook + Video).
- **Why**: Leverage high eBook volume to upsell high-margin Robots.

Replicate Success

- **Action**: Audit Washington’s sales channel; apply tactics to Houston / Sacramento.
- **Why**: Normalize performance across top-tier markets.

Price Optimization

- **Action**: Increase price of "Blueprints" by 10-15%.
- **Why**: High volume elasticity suggests margin can be improved without losing sales.

TOOLS & METHODOLOGY

Technology Stack

Data Ingestion

- Products Table
- Customers Table
- Orders Table
- ProductCategory Table

SQL Transformation

- master_sales_data Table

Visualization

- Google Looker

Strategic Analysis
